

EULANDA® Small Business

Products

Base systems are well equipped but can be further enhanced with extra modules.

- | | | |
|------|---|--------|
| 1100 | <p>EULANDA® Small-Business contains the following modules: Administration of all Master- and movement data, Scale prices, client specific pricelists, Back Order Management, Information system, Accounts due, Word processor and various default interfaces. Basic system comes with one (1) user license as well as one (1) client license for the database. Base language is english (User interface and printing)</p> | 250,00 |
|------|---|--------|

Small Business supports MS SQL-Server Express or MSDE only, both are included. Max database size is limited to 4 GB. EULANDA® is released for use with Microsoft Windows 2000® and Microsoft Windows XP®.

1 GB of RAM or more is recommended. Max of one (1) additional user is supported.

This basic edition supports one client only and does not allow additional languages. A report generator is not included in this version. Further technical requirements can be found at www.eulanda.de hint: "Requirements"

User

User extension provide simultaneous access to the database. EULANDA® only counts logged in users.

- | | | |
|------|--|--------|
| 1301 | <p>User extensions</p> <p><i>EULANDA® Small-Business supports only one additional user a total of 2 workstations simultaneously. CITRIX and Terminalserver sessions count as workstation.</i></p> | 250,00 |
|------|--|--------|

Modules

Modules offer extended functionalities. When a module is titled as basesystem, it is needed for other modules as well. This dependence is shown in the description of the modules available.

1703	Import Datanorm. This modul imports Datanorm data version 3.0, 4.0 and 5.0	150,00
1704	Export DATEV to DV format Invoices are exported as debit estimation. This format can be imported from most accounting systems.	150,00
1708	DTA Bank Clearing Invoice payable marked as direct debit are exported to the DTAUS file format and thus transferrable with your banking software (SFIRM, ProfiCash) directly to your bank. DTA exports are protocolled and archived. The offset of open items is automatic.	150,00
1748	ESR Interface (Switzerland)	250,00
1728	Point Of Sale	250,00
1735	Interactiv statistics	150,00
1737	Sales agent settlement	150,00
1740	Transfers of XML orders	150,00

EULANDA® Small Business

Bundles

Bundles are common selections of modules relating for use in certain application areas.

1901	Bundle "Superior" containing the following modules 1301, 1703, 1704, 1708, 1728, 1235, 1737, 1740	850,00
------	--	--------

EULANDA® Professional

Products

Base systems are well equipped but can be further enhanced with extra modules.

2100 EULANDA® Professional contains the following modules: 450,00

Administration of all Master- and movement data, Scale prices, client specific pricelists, Back Order Management, Information system, Accounts due, Word processor and various default interfaces.

Basic system comes with one (1) user license as well as one (1) client license for the database. Base language is english (User interface and printing)

Small Business supports MS SQL-Server Express or MSDE only, both are included. Max database size is limited to 4 GB. EULANDA® is released for use with Microsoft Windows 2000® and Microsoft Windows XP®.

1 GB of RAM or more is recommended.

Further technical requirements can be found at www.eulanda.de hint: "Requirements"

User

User extension provide simultaneous access to the database. EULANDA® only counts logged in users.

2301 User extensions 450,00

CITRIX and Terminalserver sessions count as workstation.

Clients

Additional databases may be added by buying additional clients. EULANDA® supports communication between databases using rules which are applied while customizing the program.

2401	Additional client	450,00
	<i>Additional databases may be added by buying additional clients. EULANDA® supports communication between databases using rules which are applied while customizing the program.</i>	

Correspondence languages

Used to translate reports into the respective language using the build in dictionary. Some texts may be translated creating language sections.

2502	Correspondence language German	250,00
2503	Correspondence language English	250,00
	<i>Correspondence language "Englisch" is included in the base system.</i>	
2504	Correspondence language French	250,00
2505	Correspondence language Italian	250,00
2506	Correspondence language Dutch	250,00
2507	Correspondence language Spanisch	250,00

Modules

Modules offer extended functionalities. When a module is titled as basesystem, it is needed for other modules as well. This dependence is shown in the description of the modules available.

2701	Administration of article charges incl traceability for every individual charge	450,00
2702	Export to DataNorm Produces DataNorm fileformat 5.0 incl output to file, FTP, Email or CDRW	450,00
2703	Import Datanorm. This modul imports Datanorm data version 3.0, 4.0 and 5.0	250,00
2704	Export DATEV to DV format Invoices are exported as debit estimation. This format can be imported from most accounting systems.	250,00
2705	DATEV output to EV format Invoices are exported as debit estimation. The EV format supports long account and long invoice numbers.	350,00
2707	DIGIS Interface	250,00
2708	DTA Bank Clearing Invoice payable marked as direct debit are exported to the DTAUS file format and thus transferrable with your banking software (SFIRM, ProfiCash) directly to your bank. DTA exports are protocolled and archived. The offset of open items is automatic.	250,00
2709	EBAY adjustment for auctions	2.500,00
2723	Purchasing Ordering System incl. backlog and purchasing suggestions. Every article can have any number of suppliers attached.	750,00
2748	ESR Interface (Switzerland)	250,00

EULANDA® Professional

2724	Radio server base module	450,00
2725	Radio server addition: Order entry	250,00
2726	Radio server addition: SQL Screen	250,00
2727	Extended stock taking	250,00
